EXAMINER'S AMENDMENT

1. An extension of time under 37 CFR 1.136(a) is required in order to make an examiner's amendment which places this application in condition for allowance. In a communication on September 30, 2009, Mr. Daniel O'Byrne authorized the following Examiner's amendment. Further, Mr. O'Byrne confirmed that a fax was sent to the PTO on September 28, 2009 authorizing the Examiner's amendment (which authorization included a duplicate amendment), requesting an extension of time for **2 MONTH(S)** and authorizing the Director to charge Deposit Account No. **13-3860** the required fee of **\$490.00** for this extension as well as authorizing the following examiner's amendment. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

2. The application has been amended as follows:

In the Claims

Claims 16 and 17 have been rewritten as follows:

-- 16. (currently amended) The apparatus according to claim 17 [[9]], wherein said cutting edge of said blade has a profile that is substantially shaped like a circular arc for being that is concentric with respect to a path of rotation of said cups ~~conveyed by said carousel~~, said inlet portion being formed by a plate and a complementary plate that support ~~for supporting~~ said blade.

17. (currently amended) An apparatus for making a fracture cut in a plastic cap, the plastic cap having an axis of symmetry thereof and comprising a cup with a side wall and a safety ring, the fracture cut being made in the side wall of the cap between the cup and the safety ring, the apparatus comprising:

-a footing and a frame;

-rotary means supported on said footing and provided with at least one mandrel that has a rotation axis thereof and is arrangeable inside the cup of a cap;

-a blade supported on said frame and arranged along a path of movement of the at least one mandrel for making said cut with a cutting edge thereof,

-a cap inlet path portion associated with said blade [[so as]] and including means to offset the axis of symmetry of the cap with respect to the rotation axis of said mandrel by clamping the cap side wall against said mandrel, said rotary means rotating being suitable for rotary actuation of the at least one mandrel as it moves along said blade located inside the cup of the cap to produce rolling of the clamped side wall about the axis of symmetry of the cap and along the cutting edge of said blade for making said cut; and

-recentering means comprising at least one pusher and a cam means supported at said frame, said cam means moving being suitable to cause motion of said at least one pusher toward said path of movement of the at least one mandrel to act on the cap side wall for recentering said cap so that the symmetry axis thereof coincides with said rotation axis of the mandrel.--.

Claims 20 and 21 have been rewritten as follows:

-- 20. (currently amended) The apparatus of claim 18, wherein said recentring means comprise a plurality of pushers, ~~which act~~ each for acting on the side wall of each one of the plurality of caps in a direction that is substantially radial and centrifugal with respect to said carousel, said plurality of pushers being actuated by said cam means.

21. (currently amended) The apparatus of claim 20, wherein each one of said pushers has a substantially quadrangular shape with a surface thereof for contact with the side walls of the cups that is convex, said pushers being each connected to an arm that extends with a stem, said stem being slidable substantially radially with respect to said carousel within a respective guiding block of said first drum, said stem being connected at a free end thereof to a respective wheel, said cam means comprising a track that is closed in a loop and is provided on a bush that is coaxial to said carousel and is monolithic with said footing, said track being suitable for the rolling of said wheel and having such a shape as to produce radial translational motion of said pushers.--.

In the Specification

Page 2, line 17, "it" has been changed to --the apparatus--.

Page 7, line 6, "13" has been changed to --12--.

Additional Prior Art

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Rejoinder

4. Due to the allowability of the claims, the restriction has been withdrawn, and claim 16 has been rejoined and now depends from claim 17.

Remarks

5. The above changes to claim 17 have been made to more clearly define the claimed invention. The changes to claim 16 have been made upon rejoinder thereof to correct informalities and to bring the claim into agreement with claim 17 from which it depends. The above changes to claims 20 and 21 have been made to correct informalities. The changes to the specification have been made to for clarity and accuracy.

REASONS FOR ALLOWANCE

6. The following is an examiner's statement of reasons for allowance:

The prior art of record, taken alone or in combination, does not teach or fairly suggest the claimed invention. For example, the prior art of record does not teach or suggest the claimed combination of features, particularly a cap inlet path portion associated with said blade and including means to offset the axis of symmetry of the

cap with respect to the rotation axis of said mandrel by clamping the cap side wall against said mandrel as claimed combined with a recentering means comprising at least one pusher and a cam means as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Clark F. Dexter whose telephone number is (571)272-4505. The examiner can normally be reached on Mondays, Tuesdays, Thursdays and Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Boyer D. Ashley can be reached on (571)272-4502. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
